## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 2, and 4-15 (renumbered 1-14) are allowed. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Kajikawa (JP 2001-191745). As best depicted in Figures 1, 2, and 4, Kajikawa is directed to a pneumatic tire construction having an ornamental section 9 over a substantial portion of the sidewall region (represented by arc Dp). The reference further teaches that the ornamental section is formed by groupings of vertical ridges 10, wherein said groupings are circumferential spaced by sidewall regions 11 (analogous to 2a of claimed invention). In this instance, the vertical ridges are analogous to the "concave grooves on the sidewall surface" and thus define "numerous cocavo-convex stripes", wherein the depth of the grooves and the spacing between vertical ridges are consistent with those of the claimed invention. The reference, however, fails to suggest, disclose, or teach the inclusion of a "protection protrusion" that projects from the sidewall surface along the periphery of each of the ridge/groove assemblies (claimed as serrated portions) noted above. In this instance, the "protrusion projections" define a boundary for each of the ridge/groove assemblies and one of ordinary skill in the art at the time of the invention would not have found it obvious to incorporate such components in the existing sidewall structure of Kajikawa. Lastly, in regards to claim 10, the prior art references of record failed to suggest, disclose, or teach the serrated portions as having a substantially triangular shape in which a width gradually narrows from a radially outer side of the tire toward a radially

inner side- while the relevant portions of Kajikawa are triangular, the width of such portions does not gradually narrower in accordance to the limitations of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
